Kevin Hallman, M.D.

***New Solutions for
incontinence, post-childbirth
hernias and avoiding a
hysterectomy.***

Monday, May 15, 6:30-8:00 p.m.

Dr. Kevin Hallman, MD, OB/Gyn specialist at River Falls Medical Clinic, will explain new minimally invasive treatments for women with stress incontinence, heavy menstrual bleeding, or prolapse, a hernia that sometimes occurs after childbirth. New products and new techniques have simplified some gynecological procedures so that women can get relief from symptoms without a long recovery time, or the need for a hysterectomy.
